Partial Differential Equations

"Beginning Partial Differential Equations"; *Peter V. O'Neil*

1 Introduction

1-1 Definitions and Terminologies

1-2 Mathematical Modeling

1-3 Classification of Second-Order Partial Differential Equations

2 First Order Partial Differential Equations

2-1 The Constant Coefficient Equation

2-2 The Linear Equation

2-3 Thc Quasi-Linear Equation

2-4 Generalized Solutions

2-5 Systems of First-Order Equations

3 The Cauchy Problem and Hyperbolic Equations

3-1 Cauchy-Kowalewskei Theorem

3-2 The Cauchy Problem for Homogeneous Wave Equation

3-3 Initial-Boundary Value Problem

3-4 The Cauchy Problem for Nonhomogeneous Wave Equation

3-5 Riemann's Method

4 Convolution and Parabolic Equations

4-1 Heat Equation

4-2 The Dirac-Delta Function

4-3 Scaling Method and Heat Kernel

4-4 General Initial Value Problem (Cauchy Problem)

4-5 Self-Similarity Solutions

4-6 The Weak Maximum Principle

4-7 Comparison of Waves and Diffusions

5 Potential Theory and Elliptic Equations

5-1 Complex-Variable Methods

5-2 Green's Identities

5-3 Properties of Harmonic Functions in Bounded Regions

5-4 The Mean-Value Property of Harmonic Functions

5-5 Solution of the Potential Equation for a Circle

5-6 Unbounded Domains

6 The Method of Separation of Variables Applicable to Initial-Boundary Value Problems

6-1 Separation of Variables

6-2 Nonhomogeneous Problems

6-3 Higher Dimensional Problems

6-4 Illustrations

7 Problems on Unbounded Domains and Integral Transforms

7-1 Brief Reviews of Fourier, Laplace, and Hankel Transforms

7-2 Problems on Unbounded Domains

7-3 Problems on Semi-bounded Domains

8 Green's Functions for Partial Differential Equations

8-1 The Adjoint Operator

8-2 The Delta Function

8-3 The Green's Function Method

8-4 Principle Solutions

8-5 Green's Function Method For The Laplace Operator

8-6 Green's Function Method For The Helmholtz Operator

8-7 Green's Function Method For The Diffusion Operator

8-8 Green's Function Method For The Wave Operator

8-9 The Eigenfunction Method
