

**Course Description: Seminar (Analytical Division) (CHEM567000 and 667000)  
by Kui-Thong TAN**

**Contents:**

Oral presentation and interactive discussions on recent literatures in analytical chemistry and related fields which have SCI IF of at least 6.

**Guidelines and rules:**

- (1) Please send me at least three different papers in PDF format with the literatures limited to those published after **Dec. 2020 (ASAP are not allowed)**.
- (2) Send me your abstract in English three days before your presentation and distribute your abstract to your classmates and post on the notice board before your talk .
- (3) Presentation is limited to 35 min and should be made by powerpoint. 15 min is for Q & A and discussions.
- (4) Each individual should raise at least 6 questions throughout the course.
- (5) The questions that cannot be resolved during the discussion should be turned in as a short summary to me and presented again in the next seminar.
- (6) The students can use AI to prepare the slides without any restrictions.

Evaluations are based on: (1) presentation skills (2) content comprehension (3) questions and answers.

Overall score is based on: (1) 70 points for presentation skills (2) 10 points for significance and impact factors of the selected papers (3) 10 points for answers (4) 10 points for question raising.
