<input type="checkbox"/>	資訊科技與媒體素養 Information technology & media literacy	0 %
<input checked="" type="checkbox"/>	多元觀點與社會實踐 Diverse views & social practices	20 %

一、課程說明 Course Description	<p>This course is intended to provide a broad overview of the many topics in psychology. This course focuses on the mental and neural bases of perception, emotion, learning, memory, cognition, development, personality, psychopathology, and social interaction. The goal of this course is to provide students with basic understanding of the major topics surrounding the mind and behavior. By integrating ideas from diverse perspectives, students are encouraged to relate psychological theories to issues in everyday life. Students will also learn to treat mental processes as an interaction between these various approaches.</p> <p>Course enrollment: Please attend the first class in person to understand the course content and requirements. Priority for course enrollment will be given to international students and seniors. Please refrain from inquiring via email. Thank you.</p>
二、參考書籍 Recommended Textbook	<p>Zimbardo, P. G., Johnson, R. L., McCann, V. (2011). <i>Psychology: Core concepts</i> (7th ed.). N.J.: Pearson Education.</p> <p>Gazzaniga, M., Heatherton, T., Halpern, D. (2018). <i>Psychological Science</i> (6th ed.). W. N.J.: W. Norton & Company</p>

三、教學方式
Classroom Activities

Students will engage in activities including lectures, course readings, written assignments, class activities and small group projects to reach these goals and objectives. These objectives will be assessed through exams, written assignments and contributions made during class participations and activities. This course will also use videos, animations, and psychological testing to increase students' interests.

四、教學進度
Course Schedule
